About our embedded Team

The Embedded Team of SIGMA Chemnitz works hardware, platform and processor independent and can refer to a large number of references around Windows Embedded, Embedded Linux and Android.

Our customers appreciate us as competent, innovative, and highly skilled partner, who will support you from the first problem analysis committed to the goal accompanied. Many years of project experience of our employees form the foundation for effective solutions on the latest state of the art technology.

Especially in the field of Windows Embedded we number amongst the last, who still provide development services for this purpose. For the assurance of quality-oriented services of our company work, we strictly follow a quality management system. Since 1996 we have been continuously certified according to DIN ISO 9001:2015.

About our embedded service

- Driver development for an image sensor on an i.MX8M platform.

Driver development for an image sensor on an i.MX8M platform

anvaajo

www.anvaajo.com

anvaajo GmbH

Originally started as a spin-off from TU Dresden, in recent years anvaajo GmbH has developed to become a technology company that offers innovative products for the investigation and analysis of develops and distributes liquids for the medical, veterinary, scientific and environmental sectors. Its interdisciplinary team is spread over the headquarters in Dresden and a branch office in Berlin.

Our customer says so:

„Thanks to many years of embedded Linux experience at SIGMA Chemnitz, the necessary driver development could be realized quickly and reliably according to our requirements.“

Franz Schröder, Development Engineer, anvaajo GmbH
