Hardware modernization

 www.fruchthof.net

About SIGMA

As a reputable system house in Saxony SIGMA Chemnitz GmbH operates as system integrator and partner of well-known Providers in the IT sector. Our over 80 employees at the Chemnitz and Dresden sites form a competent team at the location Chemnitz. With expertise, competence and over 30 years of experience we offer our customers reliable and powerful solutions.

About our client

Founded in 1991 as a company of the CobanaFruchtring Group, Fruchthof Meissen GmbH & Co. KG is a trading company for fresh fruit and vegetables known beyond the borders of the region.

Its services also include the import of goods, as well as its own ripening station for banana fruit.

The project

Over the years, the hardware used in the company was due for modernization. At the same time, the goal was to design the new IT infrastructure to be flexibly expandable and with central data storage.

This was intended to accelerate data access and availability in the company and improve data security.

The planning for the coming years also included a renewal of the software solution.

To do this, the new hardware to be purchased must offer the possibility of expansion.

Fruchthof Meissen

The realization

Before modernizing the operational IT, a detailed planning workshop was conducted together with SIGMA Chemnitz GmbH, during which the requirements and parameters of the future IT landscape were recorded and documented.

This made it possible to develop a solution specifically designed for the customer in order to align the IT with the needs of the coming years.

Central data storage was implemented with a new ETERNUS DX80 storage from Fujitsu.

The IT landscape can be easily virtualized with VMware virtualization software.

The VEEAM backup software enables the realization of a modern and secure backup concept. Thanks to the detailed planning carried out in advance, both the planned budget and the estimated time frame for implementation were achieved during the modernization of the operational IT.

This is what our customer says...

„SIGMA Chemnitz has shown itself to be a competent partner for us. The planning phase at the beginning in particular gave us the necessary assurance that the result would be in line with our requirements. We are very satisfied.“

Patrick Kaluzny, IT Manager at Fruchthof Meissen GmbH & Co. KG
