About SIGMA

As a reputable system house in Saxony SIGMA Chemnitz GmbH operates as system integrator and partner of well-known Providers in the IT sector. Our over 80 employees at the Chemnitz and Dresden sites form a competent team at the location Chemnitz. With expertise, competence and over 30 years of experience we offer our customers reliable and powerful solutions.

About Stadtwerke Annaberg-Buchholz Energie AG

Stadtwerke Annaberg-Buchholz supplies electricity, natural gas and district heating for the city and the entire region - around 50 employees are responsible for the smooth operation as a reliable guarantor of a safe and cost-effective supply. Becoming more efficient is an important goal, especially for medium-sized and smaller energy suppliers in particular, to be able to survive better in the liberalized energy market. All areas of the Stadtwerke Annaberg-Buchholz are required to their processes in terms of economic efficiency and productivity.

The project

Optimization potential was quickly found in the IT area.

The goal was to prioritize upcoming consolidation measures in order to replace the underperforming servers with a centralized and reliable platform.

The need for action in this area was recognized early in Annaberg-Buchholz and looked for information technology support in early spring of 2006.

They searched for a regional service provider and decided to switch to Fujitsu Siemens Blade technology and to SIGMA Chemnitz GmbH. Blade servers deliver more computing power, highest performance and maximum redundancy while requiring only minimal space, low power consumption and significantly simplified system management.

These were reasons for choosing the BX600 blade eco system.

This is what our customer says...

„I am very happy that we were able to find a space-saving and high-performance server solution that pays for itself in the shortest possible time.“

Jörg Tottewitz, member of the executive board of Stadtwerke Annaberg-Buchholz
