## About Stadtwerke Annaberg-Buchholz Energie AG

Stadtwerke Annaberg-Buchholz Energie AG was founded in 1992 as a municipal utility and service company. Today, the municipal utilities supply tens of thousands of households and companies throughout the region and have become a key player in the Erzgebirge region. The supply spectrum ranges from electricity, gas and district heating to multimedia services. In addition, the municipal utilities also operates several parking garages and swimming pools as well as a vacation apartment house on the Baltic Sea island of Usedom. In addition to Annaberg-Buchholz, the company has service branches located in Thum, Zschopau, Chemnitz, Zwönitz, Flöha, Hohenstein-Ernstthal and Kirchberg.

## The project

In the process of standardization and further development of the IT landscape of Stadtwerke Annaberg-Buchholz Energie AG, a migration of the previous Tobit groupware solution to Microsoft Exchange Server was decided. This involved the conversion of about 130 mailboxes and the associated groupware functionalities. After the selection of the new system, SIGMA Chemnitz GmbH, as the contracted service provider, carried out a dimensioning of the requirements and created and implemented a concept for the introduction of the new system. In the process, the requirements for the interfaces of the existing ERP system and the archiving system were also examined. With the implementation of the migration, the backup was brought up to date and the backup process accelerated. The connection and management of mobile devices such as smartphones was improved.

## This is what our customer says...

*„By switching to Microsoft Exchange, we have set up our e-mail and groupware system future-proof. The connection of mobile devices was improved and automated legally compliant archiving was made possible. The implementation by our service provider - SIGMA Chemnitz GmbH - went smoothly.“*

Marcus Hofrichter, Head of Information Technology at Stadtwerke Annaberg-Buchholz Energie AG
