## TILLIG Modellbahnen GmbH

The company, based in Sebnitz, Saxony, is one of the most important manufacturing companies for model railroads in Germany with an excellent reputation among lovers of small railroads and is the market leader in TT gauge (scale 1:120). Precision, attention to detail and reliability characterize all products. The highest self-imposed standards in all manufacturing steps and the constant search for improvement possibilities result in high-quality models with high attention to detail and the finest engravings.

## The project

The renewal of the IT landscape was necessary to provide the performance and storage space for the upgrade of the existing ERP system and to create the prerequisites for a domain migration. Before the project began, IT sizing was performed to make the investment future-proof. The replacement of the hardware was carried out during live operation without interrupting the customer's work.

## *This is what our customer says...*

*„We have chosen SIGMA Chemnitz GmbH because of their competence and experience. The project implementation was well thought out, so that the changeover of the hardware went smoothly. The cooperation with SIGMA Chemnitz GmbH has paid off for us, as we have achieved our goals.“*

Torsten Elias, Accounting and IT at TILLIG Modellbahnen GmbH
