About SIGMA

The SIGMA Chemnitz GmbH parent company is an experienced system house with over 80 employees at the Chemnitz and Dresden sites and has been offering a wide range of professional services in the fields of information technology, management and organization since 1990. The group of companies has had ERP experience since 1993.

SIGMA Software und Consulting GmbH has been maintaining an intensive partnership with SAP in the field of medium-sized business solutions since 2007.

All our consultants, developers and sales staff are certified by SAP and continuously undergo extensive training. We love SAP Business One!

About Werkzeug-Eylert

Now in its fourth generation, this family-owned Chemnitz-based wholesale company with 80 employees offers a comprehensive range of articles for industry, business, commerce and public authorities.

SAP Business One HANA meets SIGMA Performance Booster

Challenge / Goals

With many years of experience and over 3,000 customers at national and international level, Werkzeug-Eylert is a strong and reliable partner for all questions relating tools, machines and accessories.

The extensive range on site as well as the attractive online shop meet the demands of the industry and make every craftsman's heart beat faster. This was exactly the advantage - the connection and clarity of different, complex business areas.

The solution - SAP Business One HANA with SIGMA Performance Booster

In order to present all business processes clearly, only a modern and equally scalable ERP system came into question for the growing company. The decision was simple - SAP Business One HANA, optimised by various SIGMA add-ons and SIGMA Software and Consulting as a highly competent partner for the implementation.

The possibility of storage location management and the support of the performance booster SIGMA Mobile Warehouse Management improves the clarity in the areas of warehousing and logistics. Furthermore, the SIGMA Digital Packing Table add-on supports the picking and dispatch of goods. The browser-based SIGMA BDE add-on for SAP Business One provides additional transparency in the picking and packing process.

A fully integrated and simple archiving solution is provided by the CKS.DMS add-on. The connection of the online shop (Eylshop) is of major importance. Through close cooperation and constant communication between Werkzeug Eylert and SIGMA Software und Consulting GmbH, e.g. internal training courses, SIGMA can pass on its know-how and our partner Werkzeug Eylert benefits from this advantage in the way that, for example, interfaces can be programmed independently by the customer.

We are looking forward to an inspiring project!
