## About SIGMA

As a renowned system house group, the SIGMA Group acts as a system integrator and partner of renowned providers in the IT sector. The more than 80 employees of the group form a competent team at the locations Chemnitz and Dresden. With know-how, competence and more than 30 years of experience we offer our customers reliable and powerful IT solutions. The group has ERP experience since 1993, and SIGMA Software und Consulting GmbH has maintained an intensive partnership with SAP in the area of mid-market solutions since 2007. All of our consultants, developers and sales staff are certified by SAP and regularly undergo further training. We love SAP Business One!

## About PURIZE® Filters

PURIZE® Filters GmbH & Co. KG, based in Großräschen, Germany, offers pleasure-seeking smokers an innovative solution in the form of the PURIZE® activated charcoal filter, which significantly improves their smoking experience while reducing pollution. The range is complemented by other smoker accessories and lifestyle articles.

## PURIZE® Filters optimizes business processes with SAP Business One

[www.purize-filters.com](http://www.purize-filters.com)

### Initial situation

As PURIZE® continued to grow, the need for an advanced solution and an alternative to the stand-alone solutions used in the past became apparent. In the future, the company's ongoing growth will be supported by an end-to-end, continuously developing ERP system as well as a trustworthy partner with extensive support and short response times.

### The solution - SAP Business One HANA as a hosting model

With SAP Business One HANA as a hosting model, in which the purchased licenses are hosted in a cloud environment, PURIZE has found the right ERP system for its growing business requirements. Compared to purchasing and maintaining your own hardware, hosting is an efficient alternative. The solution can also grow flexibly with the company and access to company data is possible at any time and from anywhere.

PURIZE® Filters GmbH & Co. KG decided to use the SAP HANA in-memory database, which enables access to reporting and analysis in real time.

### SAP Business One supported by SIGMA Performance Booster

With our performance boosters, we offer the optimal extensions for SAP Business One. To get the most out of the ERP software, PURIZE® also decides to extend the system with our add-ons.

With SIGMA Mobile Warehouse Management, the manufacturer of high-quality active carbon filters will digitize its warehousing in the future and record all processes related to picking and packing in real time. To speed up the packing process, the SIGMA Digital Packing Table with shipping service provider interfaces to DHL, DHL-Express and Schenker will also be used. The SIGMA PDA terminal will ensure paperless production and more transparency in the production process. For storage and GoDB-compliant archiving of tax-relevant data, the company also relies on the cks.DMS add-on.

We are looking forward to an exciting project and further successful and professional cooperation.
