About SIGMA

As a reputable system house in Saxony SIGMA Chemnitz GmbH operates as system integrator and partner of well-known Providers in the IT sector. Our over 80 employees at the Chemnitz and Dresden sites form a competent team at the location Chemnitz. With expertise, competence and almost 30 years of experience we offer our customers reliable and powerful solutions.

About INFOR

Infor is one of the largest manufacturers of business software for the manufacturing and wholesale industries. With 41 subsidiaries and about 90,000 customers, the company has a global position. Germany plays an important role for Infor. Several development centers are located here development centers (e.g. in Karlsruhe, Breisach, Stuttgart and Leipzig). Infor sets itself with the goal of providing customers with the best possible software experience at lower total cost of ownership.

About INFOR LN

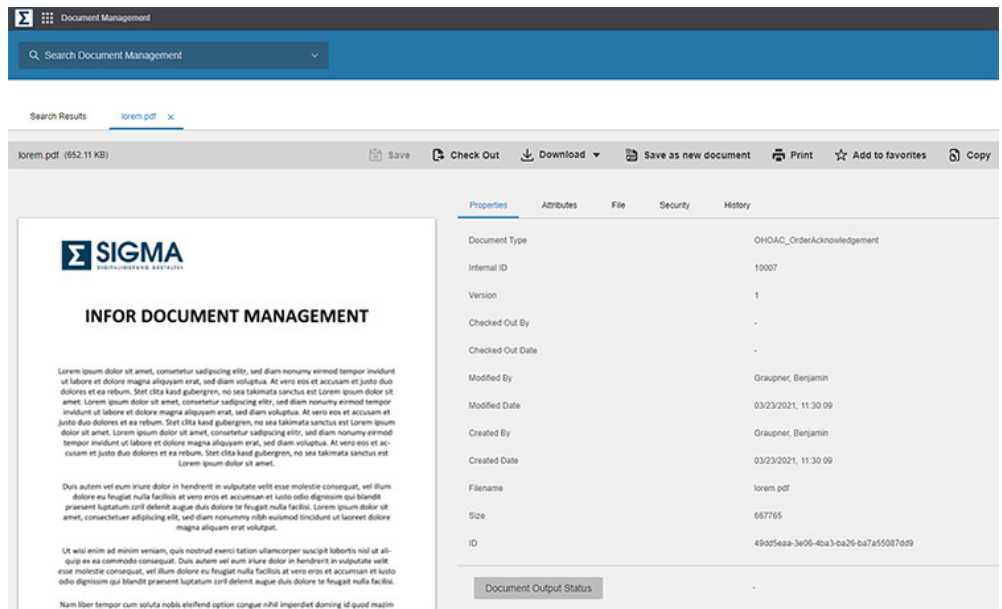

Infor LN is one of the leading ERP solutions. The software provides best-in-class and sophisticated functionality in the areas of finance, supply chain, manufacturing, project management, and service. Infor is used by over 4,500 companies worldwide.

Infor Document Management

Infor Document Management (IDM) is an extension to document management that enables **processing and linking of documents**, such as with transactions, customers, or business partners within the Infor LN ERP system.

Document management is based on **individually defined document types, users, authorizations, and workflows**. You can perform the processing or linking of the documents in document management yourself, or directly in Infor LN through a widget.

We offer the **integration** of Infor Document Management and the required **settings**. Send us an email and let us know what you need.

Advantages of IDM (Infor Document Management)

The automatically generated **history**, the **archiving** option, and the ability to send documents as email attachments in **Outlook** will streamline your everyday work activities.

The IDM module is already included in Infor OS, is available in multiple languages, and enables communication with, and tracing of, your documents in third-party systems via Infor ION.

If necessary, an interface specifically developed by SIGMA makes it possible to import documents from **HiDOX** into Infor Document Management. You also have mobile access to Infor LN processes, via smart phone, for example, and can display and process your documents by means of the **SIGMA App** and a special extension.
